Re: Amendment to Notice to Conduct Mining UT-054-91-17N UT054

Dear Mr. Rowley:

As promised, I am sending this amendment to outline construction details of the road to be built south of Section 36, Range 2 West, Township 12 South.

The enclosed centerline survey indicates the route of the road. The portion of the road referenced in your letter dated August 9, 1991, extends from the north line of T12S, R2½W, Sec.36, northeast to the quarry site. The amended portion of the road extends southwest from the State Land Section 36 to the existing county road.

All roads will be graded 20 feet wide and improved enough to haul about 75 loads of material for a test burn. If the test burn is successful, the new road will be improved and continue to operate as a haul road. If the test is unsuccessful, all newly disturbed lands will be reclaimed and revegetated in accordance with the surrounding ecosystem. The total length of the road across BLM lands will be 4092 feet, covering 1.9 acres. This leaves 3.1 acres maximum acreage in the pit area for our test run.

We intend to begin this process about May 4, 1992. Please advise us of any concerns or requests you have.

Sincerely,

Terry Kerby
Technical Supervisor
